8 Strategies for Success: How to Pass the Test on the First Try!

1 GETTING STARTED

To become a licensed insurance professional, you will need to pass a state-mandated exam. That exam will require a fair amount of reading, comprehending, and retaining information. In other words – STUDYING

2 COMMITTING TO A STUDY PROGRAM WITH AN A.D. BANKER ROADMAP

Before starting any new program of study, you need a plan that is easy to follow. This plan should keep you focused and allow you to stay on track. The A.D. Banker Road Map is designed to do just that by recommending daily assignments and providing a checklist format. Following the Road Map will help to avoid procrastination and motivate you to complete the program on time!

3 WORKING TOWARD A GOAL

When studying for a licensing exam, it is important to study toward a deadline – your test date! Scheduling your exam before you start a study program forces you to work toward a goal and manage your time wisely. If you wait to schedule your exam until you feel you are ready, you may end up procrastinating and losing sight of your goal. Success comes to those who steadily work toward a goal!

4 IDENTIFYING STUDY STRATEGIES THAT WORK FOR YOU

There are a variety of study strategies individuals use when learning something new. The best strategies should be based on how an individual learns best, known as a learning style. Most people have never identified their own preferred learning style. Knowing HOW you learn best will help you make the most of the time you have to learn something new. There are different strategies available for every learning style. The 3 learning styles are Visual, Auditory, and Kinesthetic (Tactile):

- **Visual Learners** learn best through seeing
- **Auditory Learners** learn best through listening
- **Kinesthetic Learners** learn best through doing

Once you identify your learning style, you can adapt your method of study for a more effective learning approach.

Overview

Online materials including, but not limited to: online courses, online flashcards, online on-Demand videos, online live courses, online chat or question functionality, online note taking abilities, online material updates to content, online quiz question banks, online exams, online tech support.

Online Courses include:

- Online course curriculum
- Integrated Video Lessons
- Online PDF Study Manual (download, open, print)
- Retention Questions (reside within content)
- Chapter Quizzes
 - Relevant content links to curriculum
 - 15 question exams
 - At least 45 questions in each Chapter Quiz question pool
- Comprehensive Exams
 - 800+ questions
 - Timed state exam simulation
 - Unlimited attempts
 - Each attempt has new questions
 - Answers are automatically scrambled
 - Summary Result provided upon completion to assist student to identify where they are strong/weak
- Drag and drop activities
- Online Note Taking (printable)
- Search functionality
- Videos on Demand - download and watch videos offline or online
- Support - technical and content support via Phone or email
 - Automatically includes student information and course location (slide, question)
- Guarantee Exam - free optional exam
- Certification Exam - where required and fully integrated into the online course with electronic affidavit

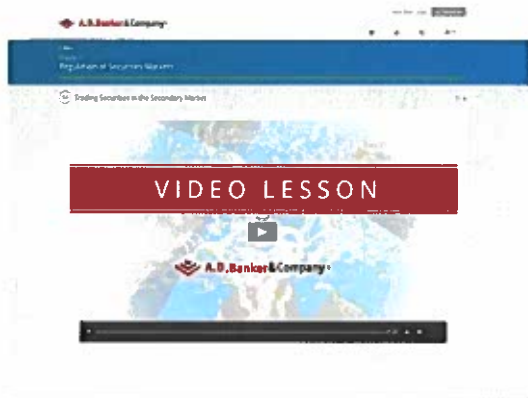

Additional Learning Tools and Technology

- Online and printed flashcards
- On-demand and downloadable videos
- Online practice exams - Separate question pool from the online course
- Email/phone support for content, questions, and technical
- Live instructor led Webinars
- Online material updates to content, questions, and tools
- Offer print formats of study materials books and updated content

Online Course

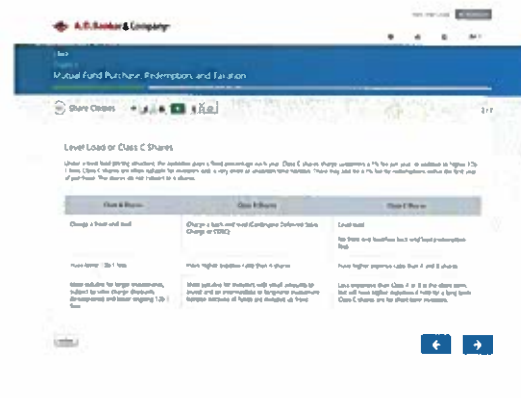

Video Lessons

Fully integrated video lessons can be viewed independently.
